In astrology, those born between June 1–20 are Gemini’s Twins. They have two distinct sides to their personality: sociable and ready for fun, or serious and thoughtful. Sometimes they feel as if one half is missing, so they forever seek new friends. Those born between June 21–30 are Crabs of Cancer. Guided by their hearts, Crabs are deeply emotional and nurturing. They create comfortable homes and always welcome people into their circle.

Rose-Colored History

This June, Rose Month, consider how a rose is more than just a mere flower. Roses are filled with symbolism and meanings that change depending on the color of the flower: red means love and passion, pink means gratitude and admiration, white means innocence, and yellow means friendship. These color-coded meanings, however, are relatively recent inventions.

The symbolic importance of roses dates back to the ancient Greeks, Romans, and Persians. Greeks told the myth of Chloris, goddess of the flowers, who transformed a woodland nymph into the “Queen of Flowers.” The rose has grown naturally for millennia throughout the Middle East and is associated with the creation of the world and mankind.

In early June, the city of Kashan in Iran holds its centuries-old Rose Festival, an annual harvest of desert roses. The roses are distilled into fragrant rose water and pure rose oils. In these ways, the rose became a symbol of beauty, love, and silence for Greeks and Romans. Persian legends, too, hold the rose in high esteem. The rose has grown naturally for millennia throughout the Middle East and is associated with the creation of the world and mankind.
